Famine - Test work - Siruguppa Taluk - Sirigeri-Karur Road - Report - submitted.

Ref.- Board's Ref. M. No. 665/38-1, dated 20-1-38.

The work on the Sirigeri-Karur Road test work was situated near Sirigeri. On 5-1-38 I inspected it. I found the workers comparatively few, inspite of the fact that metal was not being properly broken and the task was therefore light. I inspected some neighbouring villages and found that there was a fair amount of employment available in the fields. I thought that there was not much need for a test work near Sirigeri.

I inspected Karur. So far as I could judge, the need for relief was greater there. I then arranged to move the "work spot" to the neighbourhood of Karur.

After I had given orders for shifting the camp, the number on the work at Sirigeri increased. But, as I still thought that the needs of Karur were greater, I let the move go on.

I had arranged to inspect the work tomorrow when I get the Board's reference. I shall submit a further report after I have inspected.

I give below the figures of attendance on ~~this~~ this work.

Sir,

On inspecting the road I found there are two Work-Agents available, a fact of which I have not previously received information. I therefore asked the Executive Engineer on 24-1-38 to open one work in the neighbourhood of Sirigeri and another in the neighbourhood of Karur and these instructions should have been carried out by yesterday evening. There will, therefore, be a work at Sirigeri and one at Karur, both forming part of the same test work and under the supervision of the same Charge Officer.

2. When I inspected the work on 5-1-38 there was only one work-agent and work could be opened only in one place. I had to choose between Sirigeri and Karur end, as Karur seemed to me to be in greater need, I chose Karur. Owing to some confusion between my office and the P.W.D. Sub Divisional Officer, I was not informed that the second work-agent became available soon after. Had I known this it would not have been necessary to move the work from Sirigeri. I have now made arrangements which will, I hope, prevent such confusion hereafter.

In view of the rapid increase in the attendance when the Coll^n decided to move the work from Sirigeri and 16.1.38 when it was actually moved, the Coll^n would have done well advised to reconsider their decision of the 5th before putting it into effect.

The breakdown of liaison between the Dept. & the Coll^n is not satisfactory
